

## High power CCT LED implementation as desired placement

High-Power-LED circuit board

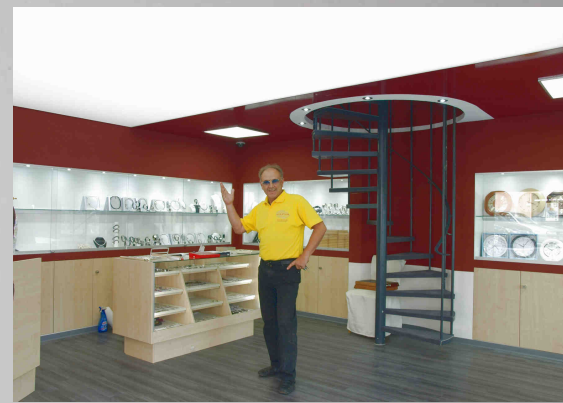

5 LEDs, Cold and Warm White 15W,  
DC 24V, length of 300 mm

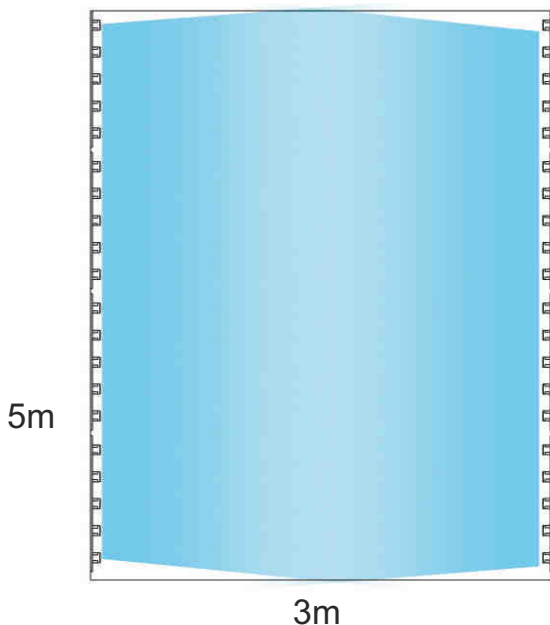

High-Power-LED circuit board

5 LEDs, Cold and Warm White 15W,  
DC 24V, length of 550 mm

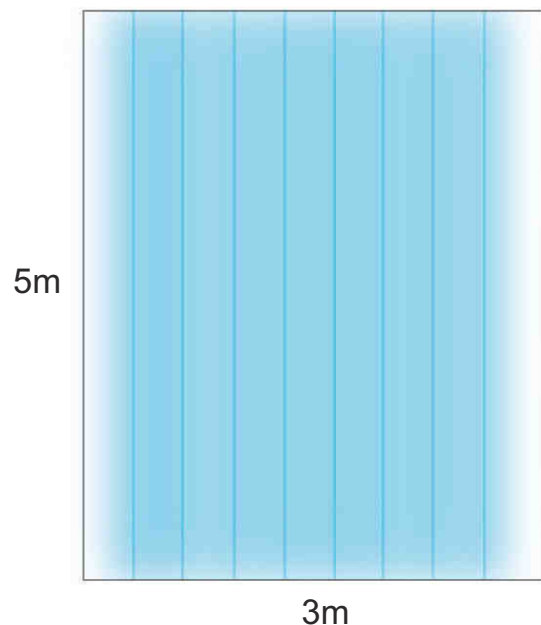

Velasun introduces new High Power LED Strip with increased capacity before. Allows you to uniform illumination of the entire ceiling create a wall. Light from a high power LED strips distributed over 3m distance.

### High power LED

### Led Band

As an example for comparison High Power LED strips and an ordinary LED ribbon, look at the drawing of the room. The room with the masses 3m x 5m: High power Led strip (not flexible) are on the longer sides of the room installed (in this case, there are 5m long sides).
